

Welcome to the Joint Service Pollution Prevention Technical Library Software System

The Joint Service P2 Technical Library is the single comprehensive resource for information on equipment, technologies, and management practices that reduce or eliminate the generation, disposal, and release of pollutants at joint service installations. The P2 Technical Library is an excellent source of the lessons learned and success stories throughout the joint services, and is useful for researching pollution prevention opportunities during P2 plan development and other projects. We hope that you find the information useful and hope it assists you in reducing waste generation and in meeting compliance goals.

The library consists of four major resources plus hundreds of other reference documents. These four components include:

Joint Service P2 Opportunity Handbook:

A compendium of more than 200 detailed data sheets that identify "off-the-shelf" P2 technologies, management practices, and process changes that reduce the amount of hazardous and solid waste generated at joint service facilities.

Navy's P2 Equipment Book:

Identifies more than 100 commercial P2 technologies purchased or evaluated through the Navy's P2 Equipment Procurement Program.

DLA's Environmental Products Catalog:

The Environmental Products catalog contains more than 800 national stock-numbered items in 19 categories. The Catalog is a user-friendly publication which clearly suggests alternatives to previously used products or processes.

Joint Group on P2 (JG-PP):

JG-PP was established to change military specifications/standards, budget constraints for pollution prevention, and to establish common test protocol acceptance of alternatives.

Features of the Software:

Complete versions of the P2 Opportunity Handbook, Navy P2 Equipment Book, DLA's Environmental Products Catalog, and JG-PP reports are available on the CD or can be loaded to the hard drive. New features include data sheets on Air Pollution Issues, a "Shops Directory" to facilitate access to data sheets and equipment, National Stock numbers for featured products and equipment and MSDS links for replacement products. Other features include:

- More than 200 Joint Service and DLA Pollution Prevention and environmental resource documents organized by service with the ability to copy documents to the hard drive.
- Runs off of a CD, so there is no need to load the program to the hard drive.

- Copies of Microsoft Viewers (Word, Excel and PowerPoint) Adobe Reader and Netscape Navigator 4.01 are available for use and download
- Links to featured web sites for those with Internet access.

Hardware Requirements:

- Windows 95/98 or NT
- 486 CPU or better
- 8 mb RAM
- 256 color monitor with resolution set for 800 x 600
- Double speed CD ROM drive or higher
- Windows compatible sound card (not required)
- Mouse

Setting up and Starting the Program:

These instructions assume that the AutoPlay feature of Windows 95/98 is turned on.

Make sure Windows 95/98 is fully launched and running on your computer. Insert the CD into the CD-ROM drive. After a brief delay (5-20 seconds), the setup program will ask if the software has been set up yet. If it is the first time using the CD on the computer, click "No this is the first time." After clicking, you will be prompted to set up the program. Click yes. Follow the on-screen instructions to complete the setup program. After the setup is complete you will be asked if you want to start the program. Click yes and then "finish" to start the program. Once you have completed the setup, the CD will run automatically any time you insert the program CD into the CD-ROM drive.

If AutoPlay is Disabled:

If you have disabled the "AutoPlay" feature on your CD drive, the first time you run the CD you will have to execute the file setup.exe using the Windows run menu or double click this setup.exe in Windows explorer. After running setup.exe, you only need to run the demo32.exe file on the CD for the software to operate. You also can start the CD by choosing Programs from the start menu. Next choose Joint Service P2 Library CD.

Browser:

The software has links to web sites as well as documents that are viewed with a browser. The program uses your default browser to make these links. If you do not have a browser installed, please install the Netscape browser included on this CD.

Feedback and Additional Information:

Please provide feedback on the Joint Service Pollution Prevention Technical Library Software system by completing the Feedback form included with the software.

If you need additional copies of the Software, or would like to ask questions, or comment on the Library, please contact the Project Manager:
